

## 2024 HSC Industrial Technology MAJOR PROJECT

# Statement of Intent

### Name

Ethan

Juracich

### Product

Steam Bent Hanging  
Seat

#### Intention:

To design and build a hanging chair for my living room.

#### Motivation:

There is a need in my house to have extra seating in the living room for guests. This hanging chair will also offer an interesting and aesthetic furniture piece in my living room that contributes to the modern style.

#### Function:

The project had to be capable of supporting the weight of 1-2 people, up to 200kg.

#### Aesthetics:

The seat needed to fit in with the modern aesthetic of the furniture and joinery in my house, which features the use of lighter-coloured timbers and curves.
