

2024 HSC Industrial Technology MAJOR PROJECT

Statement of Intent

Name

Jaime
Muldoon

Product

Pool Table

Intention:

To design and create a high-quality pool table that is both practical and aesthetically pleasing. I applied the skills I've developed during my previous high school years and incorporated architectural elements in a time-efficient manner.

User requirements:

My skillset includes the ability to safely handle both power and hand tools. Time management is also crucial when completing a major project under pressure, as I needed to ensure all details and aspects were executed within the given timeframe.
