

2024 HSC Industrial Technology MAJOR PROJECT

Statement of Intent

Name

Lachlan
Hoare

Product

Circular Bookshelf with
Drawers

Intention:

To manufacture a unique and functional circular bookshelf that serves as a stylish storage solution but also fosters a sense of creativity and innovation in its design. I aimed to combine my previous skills in Industrial Technology to construct this functional, seamless circular bookshelf. I needed to develop my skills and abilities in order for it to be well-crafted and durable in its structure, ensuring it is visually striking to any room.

Motivation:

The motivation behind my project is my interest in reading and books and suggestions and ideas from my parents, who inspired me to design a unique bookshelf.

Function:

I sought to create a stable, compact bookshelf that can support several books and pieces of decor in either a bedroom or a living room. It will be a useful to store books, organise my room and can be used for multiple purposes.
