

## 2024 HSC Industrial Technology MAJOR PROJECT

# Statement of Intent

### Name

Madison  
Everitt

### Product

Beverage Trolley

#### Intention:

To design and construct a Beverage Trolley that meets the requirements of a high-quality, sustainable, practical and aesthetically pleasing piece of furniture.

#### Motivation:

I chose this project because it allowed me to apply my current woodworking skills whilst learning new techniques and approaches.

#### Inspiration:

This Beverage Trolley was inspired by the Coronation Coach made by Jim Frecklington. My design has aspects of the carriage such as gold inlays and hardware, curving edges and handles that mirror the external shape of the carriage as well as various other design aspects. This design follows the concept of modern style as well as the aesthetic of the existing timber furniture in my house.
