

## 2024 HSC Industrial Technology MAJOR PROJECT

# Statement of Intent

### Name

Sean  
Stikkelorum

### Product

Curved Lounge Chair

#### Intention:

As a testament to sustainability, I wanted to craft a lounge chair with intricate, curvy features and organic patterns.

#### Motivation:

My goal is to earn a Band 6 for this portfolio, which motivates me to strive for excellence. I also aim to extend my woodworking skills and knowledge, driving me to complete this project. Additionally, I am designing and constructing this lounge chair because I need a comfortable one for my home.

#### Aesthetics:

Inspired by modern design, the chair has been made from recycled school tables. My design has necessitated me to learn how to bend wood to achieve the desired lounge chair shape.
