TITLE

The Doffee Table

AREA OF DESIGN

Furniture Design

The Doffee table is an innovative response to the furnishing pressures of small-space living. This piece combines two essential furniture items, the dining and coffee table.

Through the pursuit of an ergonomic and functional design a mechanism was designed to ensure the doffee table could effortlessly transform from a sleek coffee table to a functioning dining table. This process was unrelenting and required a lot of research, experiments and prototyping.

The Doffee table is made from tough Australian Spotted Gum hardwood, making it perfect as both a dining and coffee table. Its sturdy build guarantees a long-lasting and functional piece. The wood's natural beauty aligns with the aesthetic requirement, sleek and modern, and suits various interior styles, enhancing any space, regardless of size.
