Statement of Intent

NAME

Jacob
Laforest

PRODUCT

Shell Chair

My Intention is to design and build a piece of timber furniture. I intend to create a high quality and functional piece of furniture which can be used at my house.

I have chosen to build and design a "Curved Timber Chair" because it is going to challenge me to learn more and expand my current knowledge and woodworking skills. I intend for this chair to be highly durable and very aesthetically pleasing as it will be sitting in a prominent position in my bedroom. The chair is going to feature lots of bending timber with a contemporary finish on top of the fairly unique design to match other furniture around my house.
