My intention is to design and construct a unique "Coffee Table". It will have the possibility to be placed in a living room area, communal area, rumpus room, undercover outdoor setting etc.

This idea came to mind when I was thinking about what in my house I could update, add etc. Sharing my thoughts with others for feedback, I was shown a few pictures of inspiration.

As I haven't got a coffee table, nor have I ever had one and seeing those images of inspiration, I feel that I have a perfect place for it now and it is something I can take with me when I move to my own place.
