

2024 HSC Design & Technology MAJOR PROJECT

Designer Statement

Name

Sebastian
Morrow

Title

Interchangeable
Car/Garage Storage
System

Area of Design

Product Design

The brief was to design, develop and evaluate a storage system that provides an easy way to store items on the move or within the home using interchangeable modules.

The design makes use of slotted boxes that stack in different formations to allow storage to be transported from a mobile, boot-based location to a fixed position within the garage or house. Stacking and storing in these different sized boxes allows for customisation, increasing the range of items that can be stored.
